PROFESSIONAL SUMMARY

Full Stack Developer with nearly 4 years of professional experience developing and maintaining 7+ enterprise web applications for logistics, warehousing, and port operations, collectively supporting approximately 100 users. Strong background in .NET, SQL Server, and JavaScript, with hands-on experience in REST API integration, application deployment, and production support using IIS and Windows Server. Additional experience with the MERN stack, alongside hands-on projects involving AWS Cloud, Docker, Linux, and CI/CD pipelines.

TECHNICAL SKILLS

Programming Languages: C#, VB.NET, JavaScript, SQL
Backend: ASP.NET Web Forms, ASP.NET Core, Node.js, Express.js, REST APIs
Frontend: Angular, React.js, Tailwind CSS
Databases: Microsoft SQL Server, PostgreSQL, MongoDB
Cloud & DevOps: AWS, Docker, Linux, CI/CD Pipelines
Tools & Platforms: Git, IIS, Windows Server

PROFESSIONAL EXPERIENCE

.NET Developer | Agung Logistics | Jul 2023 – Present | Indonesia

- Develop and maintain 7+ enterprise web applications supporting approximately 100 users collectively across logistics, warehousing, shipping, and port operations, primarily using ASP.NET Web Forms, VB.NET, SQL Server, and JavaScript.
- Translate requirements from operational users and management into application features, UI workflows, and system enhancements.
- Build REST API integrations to exchange operational data between internal applications.
- Write SQL Server queries and implement database schema changes for reporting, data processing, and new features.
- Developed an Excel-based bulk import feature for the PDPLB Import system, enabling users to process SPK, Container, and Manifest data through a single import operation, replacing three separate manual data-entry workflows.

Key Systems: PDPLB Import; Warehouse Cargo Local; CRM; PBM Services; Vessel Management; TQA & BNF; Reach Stacker Digital Checksheet.

Web Developer Intern | PT Petrokimia Gresik | Aug 2021 – Jan 2022 | Gresik, Indonesia

- Developed full stack web application features using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Built responsive user interfaces using React.js and Tailwind CSS.

PROJECTS

Multi-Company ERP — Full Stack Web Application
Tech Stack: C#, ASP.NET Core, Angular, Tailwind CSS, PostgreSQL
Cloud & Deployment: Git, GitHub Actions, Docker, Amazon ECR, Amazon EC2
Live Demo: https://47.130.47.165/login

- Developed a full stack ERP web application using ASP.NET Core and C# for backend development, Angular and Tailwind CSS for frontend development, and PostgreSQL for data persistence.
- Implemented containerized application deployment using Docker, GitHub Actions, Amazon ECR, and Amazon EC2.

EDUCATION

Bachelor's Degree in Information Technology | Universitas Indraprasta PGRI (UNINDRA) | Jan 2018 – Jun 2022

LANGUAGES

Indonesian: Native | **English:** Intermediate (strong listening comprehension; working-level speaking and writing)
